

MAHIM ABDULLAH RIAN TO

BSc Student in Computer Science & Engineering

Ahsanullah University of Science & Technology (AUST)

☎ 01609302952 | ✉ mahim.cse.20230104015@aust.edu | 📍 Dhaka, Bangladesh

CAREER OBJECTIVE

Motivated and detail-oriented Computer Science & Engineering student at AUST, with hands-on experience in full-stack web development, AI-integrated applications, and embedded systems. Passionate about building scalable, real-world software solutions and eager to contribute meaningfully to academic and research-driven environments.

EDUCATIONAL BACKGROUND

Exam	Institution	Board/University	Result	Year	Group/Major
BSc in CSE (Ongoing)	Ahsanullah University of Science & Technology	AUST	CGPA: 3.3+ (Up to 6th Sem)	2023 – Present	Computer Science & Engineering
HSC	Shaheed Police Smrity College	Dhaka	GPA: 5.00	2022	Science
SSC	Monipur High School and College	Dhaka	GPA: 5.00	2020	Science

TECHNICAL SKILLS

Programming Languages: Assembly, C, C++, Java, HTML, CSS, JavaScript, TypeScript

Frameworks & Technologies: React 18, Next.js 15, Node.js, Django, PHP Laravel 11, Vite

Styling & UI: Tailwind CSS v3, shadcn/ui, GSAP 3

State & Data: Zustand, TanStack React Query, Supabase, MySQL 8+, MSSQL, MongoDB

Auth & DevOps: Laravel Sanctum, Git, VS Code, Proteus, iGraphics

Embedded Systems: Arduino, Microprocessors, Microcontrollers, C Language

LANGUAGE PROFICIENCY

Bengali: Native / Mother Tongue

English: Conversational Proficiency (Reading, Writing, Speaking)

SOFT SKILLS

Key Strengths: Teamwork & Collaboration, Problem-Solving, Tutoring & Mentoring, Analytical Thinking

COMPETITIVE PROGRAMMING

🏆 **16th Place** Intra AUST Programming Contest — Carnival 5.0 (2025) — Team: BuggyVerse

🏆 **19th Place** Intra AUST Programming Contest — Carnival 4.0 (2024) — Team: BuggyVerse

🏆 **21st Place** Intra AUST Programming Contest — Carnival 3.0 (2023) — Team: BuggyVerse

PROJECTS

Zenith Protocol — Scalable Web-Based Game Platform(In Development)

Description: A highly scalable web-based game platform employing a Plugin Architecture where a central React 'Host App' lazy-loads self-contained game modules via dynamic imports and communicates through a shared event bus. Scores, authentication, and state validation are securely handled via a robust Laravel 11 backend.

Tech Stack: React 18+ (Vite), TypeScript (strict), Tailwind CSS v3, Zustand, GSAP 3, Laravel 11 (PHP 8.3), MySQL 8+, Laravel Sanctum.

Role: Full-Stack Developer.

GitHub: <https://github.com/Mahimrio/Zenith-Protocol.git>

Portfolio — Personal Portfolio Website

Tech Stack: React 18, Vite, Three.js, GSAP(Greensock)

Role: Frontend Developer

GitHub: https://github.com/Mahimrio/My_Portfolio.git

ShasthyaHub-AI — Multi-Agent AI Healthcare Platform

Description: A comprehensive healthcare platform designed for rural Bangladesh featuring three AI-powered agents. Built for SciBlitz AI Challenge 2026. Supports bilingual interface (English & বাংলা) and is PWA-enabled for offline access.

Tech Stack: Next.js 15, Supabase (PostgreSQL + Auth + Storage), Tailwind CSS + shadcn/ui, TanStack React Query, Google Gemini 1.5 Pro, Groq Llama 3.3 70B, next-i18next, next-pwa.

Role: Full-Stack Developer

GitHub: <https://github.com/Mahimrio/ShasthyaHub-AI.git>

Eventify — Event Management System

Description: A web-based platform that allows users to host events and purchase tickets online. Supports event creation, ticket management, and user authentication.

Tech Stack: React.js, PHP Laravel, MySQL

Role: Full-Stack Developer (Frontend & Backend)

GitHub: <https://github.com/FazleRabbiMugdhoo/Eventify.git>

OfficeVolt — Techathon 2026

Description: A real-time office energy monitoring dashboard and Discord bot that simulates 15 smart devices across 3 rooms, surface live power usage, pushes intelligent alerts when devices are left on after hours or running too long. Built for the bot who wants to know why the electricity bills is higher than that.

Tech Stack: Node.js, Express, Socket.IO, React, Vite, Tailwind CSS, Discord.js v14, DeepSeek Api.

Role: Full-Stack Developer (Frontend & Backend)

GitHub: https://github.com/FazleRabbiMugdhoo/Techathon2026-Team_Prognosis.git

MRP — Market Rate Management System

Description: A system designed to track and display market prices publicly, aiming to reduce market syndicate activities and create consumer awareness.

Tech Stack: React.js, MongoDB

Role: Full-Stack Developer (Frontend & Backend)

GitHub: <https://github.com/FazleRabbiMugdhoo/mrp.git>

LockIn — Semester Routine Tracker(In Development)

Description: A personal static web app for tracking semester routines and schedules. Built as a lightweight React site with no backend dependency.

Tech Stack: Vite, React 18, Tailwind CSS v3

Role: Frontend Developer

GitHub: <https://github.com/Mahimrio/LockIn.git>

Fire Fighting Bot — Arduino-Based Robot

Description: An autonomous Arduino-powered robot equipped with various sensors and controllers to detect fire, navigate toward the source, and extinguish it by spraying water.

Technologies: Microprocessor, Microcontrollers, Proteus Simulator, C Language

Role: Embedded Systems Developer — implemented and uploaded control code to Arduino
